TRIDENT NARIMAN POINT

September 2023 - October 2023, Nariman Point, Churchgate

- I used to handle IT operations of the company such as app maintenance, desktop support and along with that i was working with JIO team for IT networking.

PROJECTS

Job profile website

<https://omharwankar.github.io/jobex/>

- This project depicts a social media platform for corporate people that helps them to find jobs.
- Developed job profile website through HTML, CSS, Javascript, and Bootstrap with feature of profiles and news.

Website for shoopkeeper

<https://omharwankar.github.io/shopkeeper/> • March 2024 - March 2024

- This project is a web-based Inventory Management System that allows users to manage their inventory, track sales, and analyze profits. It consists of HTML, CSS, and JavaScript code for the front end, and it utilizes client-side scripting to interact with the user and display dynamic content.
- **Inventory Management:** Users can view, add, and restock products. The inventory table updates in real-time.
- **Cart Management:** Users can add, remove items, and view total cost in the cart.
- **Profit Analysis:** Calculates total profit and profit after 9% tax reduction.
- **User Interaction:** Intuitive interface with navigation links and a search bar.
- **Alerts:** Notifies users to restock when inventory falls below 15.

Portfolio Website

<https://omharwankar.github.io/Omportfolio/> • November 2023 - November 2023

- It adapts various screen size and devices for seamless user experience (responsive). User can download CV. User can go through linked project to check my skills.
- Tested responsiveness by running tests on cross-platforms, achieved 100% optimal displays.
- HTML, CSS, JAVASCRIPT, BOOTSTRAP to work on a project and learn a lot in the way. Implemented website content such as text, images.
- It has features like email integration with form, form validation and animations
